SUMMARY

Experienced Frontend Developer with 7+ years of expertise, combining a strong work ethic with versatile technical skills. Passionate about leveraging cutting-edge technologies to build impactful solutions and drive a company's mission forward.

EXPERIENCE

Senior Frontend Engineer — **Arena Team**

07/2025 - Present — Remote - Part-Time

Arena is a gaming-focused network optimization platform designed to reduce latency and improve the online gaming experience through intelligent traffic routing.

- Built and maintained the **Windows desktop application** from the ground up using **Electron** and **React**, integrating desktop capabilities with a modern frontend architecture.
- Developed the platform's **Next.js** dashboard and admin panel, providing interfaces for managing users, configurations, role management and the platform's operational ecosystem.
- Engineered a highly dynamic, configuration-driven **page builder** for the admin panel, enabling reusable components and reducing duplicated implementation across the platform.
- Implemented and managed the desktop-level traffic routing system using **sing-box** and **WireGuard**, enabling optimized network routing for users and gaming traffic.

Senior Frontend Engineer / Frontend Lead — **Karamad Financial Group**

09/2025 - Present — On-Site - Tehran, Iran

Karamad Financial Group is a financial technology group with a portfolio of digital products and services across investment and financial markets.

- Took ownership of maintaining and modernizing existing products built with **Angular, React, HTML, and CSS**, ensuring stability and supporting the transition to a new development team.
- Built **Karvest.com** from scratch to production as a scalable **Next.js** monorepo, using **TypeScript, PWA, Mantine UI, Tailwind CSS, and React Query**, covering the complete frontend development lifecycle.
- Engineered a dynamic, backend-driven development system that synchronizes **forms, DTOs, validation rules, and API integrations** through backend-generated packages, reducing duplication and keeping frontend and backend contracts aligned.
- Designed and developed a new web-based game application using **Next.js, NestJS, Prisma, and SQL Server**, expanding into backend architecture and full-stack development.

Senior Frontend Engineer — **Zohal**

04/2024 - 10/2025 — On-Site - Tehran, Iran

Zohal.io is a streamlined Web Service API provider offering developers and businesses ready-to-integrate APIs for rapid product development.

- Launched Zohal.io from scratch, architecting and developing a scalable Next.js monorepo with B2B (API token management) and B2C (no-code) platforms, including a landing page, user dashboard (dashboard.zohal.io), and admin backoffice.
- Led frontend development end-to-end using **Mantine, Tailwind, and CSS Modules**, while mentoring and managing a junior developer to maintain code quality and best practices.

- Delivered a seamless user experience for both technical (API integration) and non-technical users, driving adoption of the company's web services.

Frontend Developer **Interactive10 - Property Hunter**

04/2023 - 03/2024 Remote - Dubai

Property Hunter is an AI-powered proptech platform that analyzes your preferences to recommend the best properties for purchase in any target area.

- As a key contributor to the monorepo project, I led frontend development, architecting and building a responsive Next.js web application and **React Native/Expo mobile app** with a focus on modularity and seamless user experience.
- Beyond frontend work, I actively contributed to full-stack development—integrating APIs with **tRPC**, optimizing database operations with **Prisma**, and ensuring end-to-end system cohesion.

Frontend Developer **Matap**

04/2021 - 02/2022 On-Site - Tehran, Iran

Matap is an innovative healthcare consultation platform that connects patients with expert doctors through seamless digital interactions, making specialist care more accessible than ever.

- As the Frontend Developer, I spearheaded the refactoring of Matap's web and mobile interfaces using **React Native**, **Expo**, TypeScript, and WebSocket, enhancing real-time communication between patients and doctors.
- This overhaul optimized the consultation workflow using edge technologies, reducing latency and improving usability across platforms.

TECH SKILLS

NextJS • TypeScript • ReactJS • React Native • Expo • React-Hook-Form • CVA • React-Table • Zod • Tailwind/Nativewind • React-Query • TRPC • Redux • Zustand • ShadCN • TurboRepo • Mantine UI • CSS Modules • Electron

EDUCATION

Bachelor's Degree of Computer Engineering (Software)

Ershad Damavand University *06/2025*
